Linkedin: linkedin.com/in/krishnabhatt-fullstackdeveloper

A skilled Full Stack Java Developer with over 5 years of experience in developing and optimizing complex web applications. Proficient in both frontend and backend technologies, with a strong focus on Java, Spring Boot, React, and modern web development frameworks. Eager to contribute to cutting-edge projects while leveraging my extensive experience with RESTful APIs, and deployments.

SKILLS

Programming Languages:
Java, JavaScript, TypeScript, Golang, SQL, NoSQL, Python, Docker

Technologies & Frameworks:
Spring Boot, JPA, Hibernate, ReactJS (Material UI, React Router, Formik), Angular, Google App Script, WebSockets, Microservices, Swagger RESTful APIs, REST API, AJAX, Redux

Databases:
MySQL, MsSQL, PostgreSQL, MongoDB

Development Tools:
Maven, Gradle, Git, Bitbucket, SVN, JIRA, Figma, Docker Compose

Methodologies:
Agile, Waterfall

WORK EXPERIENCE

E-Procurement Technologies Limited   On-Site (Gujarat, IN)
Senior Full stack java developer   *Aug 2022 – Aug 2024*

- Led the development of full stack applications using ReactJS and Java Spring Boot, ensuring seamless integration between frontend and backend.
- Performed quality assurance and integration testing for completed projects ahead of deployment.
- Responded promptly to customer inquiries regarding software performance and potential enhancements.
- Collaborated with developer team members and clients to timely deliver projects.
- Worked with superior to refine and finalize designs.
- Converted user requirements into technical designs and developed scopes to guide project work.
- Utilized Agile methodologies for project management, leading to successful and timely project deliveries.
- Created detailed documentation outlining software specifications, installation instructions, and troubleshooting guides.
- Utilized version control systems such as SVN and GIT hub to manage changes in source code over time accurately.
- Researched emerging technologies and programming languages to stay current on industry trends and advancements.
- Supported fellow development team with code reviews, brainstorming, and guidance.
- **Tech Stack:** Java Spring Boot, ReactJS, Swagger REST APIs, Microservices, MsSQL, MySQL, SVN, Docker, GIT hub

Entrust Software Development   Remote (California, US)
Software Engineer   *Jan 2020 – Jul 2022*

- Developed Java backend for web applications and crafted Angular, React and Vue JS for frontend applications.
- Utilized Spring Boot, JPA, and Hibernate, and worked with various databases including MySQL, PostgreSQL, and MongoDB.
- Used third-party libraries like Google Maps and OSM for live location display.
- Created proof of concepts, prepared project documentation, and developed Google Add-ons with Google Apps Script.
- Generated dynamic reports with JasperSoft, implemented JWT for authorization, and visualized JSON data with Angular and React.
- Implemented real-time communication features using WebSockets, enhancing the responsiveness and interactivity of web applications using SOAP APIs.
- **Tech Stack:** Java Spring boot, ReactJS, Angular, Swagger RESTful APIs, Google App Script, Bitbucket, JIRA, MySQL

Silverwings Technologies Pvt. Ltd   Ahmedabad, IN
Software Engineer Intern   *Jun 2017 – Dec 2017*

- Developed professional, user-friendly, and responsive websites utilizing Bootstrap, HTML, CSS, and JavaScript.
- Enhanced user engagement by implementing best design practices and conducting technical analyses to identify optimal solutions and Deployed live websites, ensuring functionality and performance for end-users.
- Mentored junior developers, providing guidance and support in their learning and project tasks.
- **Tech Stack***:* HTML/CSS, JavaScript, Bootstrap, jQuery

PROJECTS

Tea Board
- Led the design and implementation of the project modules using ReactJS Function Components with Material UI.
- Developed RESTful APIs for various modules and provided mentorship to team members.
- Conducted seminars on ReactJS to upskill colleagues for project tasks.
- **Tech Stack:** Java 17, Spring Boot, ReactJS, MS SQL, RESTful Swagger API, GitHub, Docker compose, Microservices.

NPD Web App
- Developed and integrated Swagger RESTful APIs, with a focus on performance and scalability.
- Utilized React Query for efficient data fetching and state management within React components.
- Plot JSON parsed data into datatable and designed pages in ReactJS.
- Help and guide fellow team members in resolving their queries, bugs and errors.
- **Tech Stack**: Java 17, JPA, Spring Boot, ReactJS, PostgreSQL, RESTful API, SVN, GitHub, Microservices, Docker compose.

Gail Web App
- Led the development of a web application for auctions and tenders.
- Customized and enhanced admin, tender, and negotiation modules.
- Test all module units as per documentation and maintain that module documentation.
- Help and guide fellow team members in resolving their queries, bugs and errors.
- **Tech Stack:** Java, Spring MVC, JPA, Servlet, jQuery, JavaScript, MsSQL, SVN.

E Signer Web App
- Developed a web application for legal document management with secure signature integration.
- Designed and implemented RESTful APIs using Java Spring Boot, ensuring efficient and secure communication between the frontend and backend.
- Integrated these APIs with ReactJS, enabling seamless data handling and dynamic user interaction within the application.
- Utilized ReactJS to create a responsive and intuitive user interface, allowing users to easily manage and sign legal documents..
- **Tech Stack:** Java Spring Boot, ReactJS(Material UI, React Router, Formik), MsSQL, RESTful API, SVN.

IMS Insurance Management System
- Built the backend using Java Spring Boot and developed the frontend using Angular.
- Implemented test-driven development practices using JUnit and React Testing Library, ensuring high code quality and reliability.
- Followed Agile methodologies, including regular sprint planning, daily stand-ups, and iterative development, to ensure timely delivery and continuous improvement of the project.
- Collaborated closely with cross-functional teams, refining and grooming tickets to align with project goals and timelines.
- **Tech Stack:** Java Spring Boot, Angular 10, MySQL, RESTful Swagger API, JUnit ,BitBucket, JIRA.

ELD PinPoint Driver Tracker
- Developed real-time vehicle tracking features using WebSockets and server-sent events.
- Integrated with a PostgreSQL database, optimizing SQL queries for better performance.
- Followed Agile methodologies to ensure iterative development and continuous delivery, enhancing collaboration and project outcomes.
- **Tech Stack:** Java Spring Boot, Angular 10, MySQL, RESTful Swagger API, BitBucket, JIRA, JWT.

Art Asylum (Design it your way)
- Designed an application for artists to create and sell paintings online.
- **Tech Stack:** Java 8, JSP, Servlet, third-party framework for online canvas.

EDUCATION

Gujarat Technological University, Gujarat, India | **Expected Graduation: Jul 2019**
Major: B.E. Computer Engineer | CGPA: 8.57
Center of Development of Advanced Computing, India | **Expected Graduation: Feb 2020**
Major: Java | Grade: A

CERTIFICATIONS

- **Skill up with docker**
  Completed a comprehensive course covering Docker and Docker Compose, mastering containerization, image management, networking, and deployment strategies.
- **Ultimate SQL Course**
  Mastered SQL fundamentals, including data querying, database design, optimization, stored procedures, and indexing. Hands-on experience with MySQL Workbench.

- **Ultimate Git Course**
  Completed a comprehensive course on Git and GitHub, gaining expertise in version control, branching, merging, and collaborative workflows for efficient source code management.
- **Java Developer Program**
  Center for Development of Advanced Computing (CDAC), India
  Successfully completed a Java Developer course, gaining in-depth knowledge and expertise in Java programming, including core concepts, advanced techniques, and practical application development.
